

BIKES ★ MUSIC ★ BEER

WEEKENDER

UNIVERSITY OF OREGON

JULY 13-15, 2018

This summer, Cycle Oregon is taking our legendary two-day bike bash back to school! We will be bringing the festivities to one of Oregon's most highly-enjoyable places to spend four years - the campus of the University of Oregon. We've got the whole weekend covered. The bands will be rockin', good times will be flowing and the vibe will be permanently set to "chill". Oh, and let us not forget all the spectacular cycling through the Willamette Valley's best landscapes. This is going to be the best WEEKENDER ever! We'll see you there!

★ GREAT RIDES & GOOD FRIENDS ★

Day 1

RIDE LIKE A DUCK

Long 76 mi

Medium 41 mi

Short 17 mi

Kicking off your WEEKENDER of freewheeling bike fun, choose from three routes that all start from the University of Oregon campus in Eugene before hopping on a bike path along the Willamette River. The short, most family-friendly route branches off at mile 3, travels through the edge of Springfield, and then uses a bike path along the Middle Fork of the Willamette River, before returning to campus. The medium and long routes venture through forested areas leading to the town of Mohawk. There, the medium route turns and follows the McKenzie River before joining up with the long route riders for lunch. After Mohawk, the long route rolls through small communities in Lane and Linn counties, giving riders great roads with a taste of small towns, forest, and agriculture. Medium and long route riders continue together after lunch for a flat 10 miles to the finish. When you get back to campus, prepare to switch from cycle-mode to party-mode, as the fun and festivities will be well underway.

Day 2

WINE & WINGS

Long 58 mi

Medium 39 mi

Short 17 mi

If you thought yesterday was a blast, check out what we have lined up for Day 2! Today's routes offer great views of the Willamette River and small communities to the south and east of Eugene. The short option is a mellow, but enjoyable crowd-pleaser traveling almost entirely on bike paths from Eugene to Springfield and back. All three routes begin together, but after a rest stop at Clearwater Park, the medium and long routes let you Zen out on lightly traveled country roads, with great river views, covered bridges, forest and agricultural fields. Both long and medium routes have only a few rolling hills until near the end where riders hit the day's biggest hill to climb. After that, it's back to campus. Keep your ears peeled for the live music. When you hear it, you'll know you're getting close to the rocking party celebrating good times and a great WEEKENDER.

ELEVATION + TOTAL MILES

Day 1

Long route elevation gain = 2,195 ft

Day 2

Long route elevation gain = 2,853 ft

Ride.
